EDUCATION

- **Bachelor of Business Administration in Information Systems**
  Rajamangala University of Technology Krungthep
  2017 – 2019

- **Higher Vocational Certificate in Business Computer**
  Bangna Commercial College
  2015 – 2017

- **Vocational Certificate in Business Computer**
  Bangna Commercial College
  2012 – 2015

SKILL

- HTML
- CSS
- Tailwind
- Antd
- Bootstrap
- Javascript
- Typescript
- JQuery
- React
- Nextjs
- Nodejs
- Express
- PHP
- NestJs
- MySQL
- SQL Server
- Firebase
- PostgreSQL
- Prisma

TOOL

- Postman
- Github
- Gitlab
- Docker
- Bitbucket

PROFILE SUMMARY

I am interested in working as a **Full Stack Developer**, with the ability to build both frontend and backend systems, as well as experience in problem-solving, system planning, and database design to ensure efficiency and reliability.
I possess strong teamwork and communication skills, and I am continuously developing my expertise—expanding my coding capabilities, improving system design, and learning new technologies to advance in my career.

WORK EXPERIENCE

Full Stack Developer (May 2023 - Present)
Legacy Corp Co., Ltd

- Design, develop, and maintain the company's Web Applications/Platforms using both frontend and backend technologies
- Write clean, secure, and scalable code
- Design database structures and develop APIs to support system functionality, including providing APIs for other platforms (Legacy Verse)
- Debug, troubleshoot, and optimize system performance
- Collaborate with the UI/UX team, Project Managers, and QA to deliver solutions that meet requirements
- Research and adopt new technologies to enhance system efficiency and improve development processes
- Contribute to system architecture planning and the improvement of development workflows

Full Stack Developer (info SyteLine ERP) (May 2022 - April 2023)
Premier Professional Consulting Co., Ltd.

- Gathered and analyzed customer requirements, and collaborated with the development team for implementation.
- Developed and delivered code based on client needs, including providing on-site support.
- Utilized Info StylLine ERP and developed APIs to integrate systems for seamless collaboration.

Programmer (Jan 2020 - Jan 2021)
BT Midland Co., Ltd

Responsible for gathering and analyzing internal user requirements and collaborating with the team to assess feasibility and define development approaches. Focused on transforming paper-based processes into digital systems, such as developing an IT stock management system and executive dashboards to provide a comprehensive view for decision-making. Additionally, contributed to IT support by troubleshooting and assisting users with internal system operations.

EXPERIENCE DETAILS

1. HANDHELD : BARCODE SCANNING INTEGRATION SYSTEM

Developed a barcode scanning system using handheld devices to capture barcode data and integrate it with the Info Syteline system.
Technologies: SQL, C#, XML, HTML, CSS, SoFAPI

2. CUSTOMER SERVICE : MANAGEMENT SYSTEM

Developed a web application for customers to report issues and track their status, along with an admin portal for staff to manage cases, respond, and provide updates to customers.
Technologies: PHP, HTML, CSS, SQL Server, jQuery, Ajax

3. IT STOCK & KPI DASHBOARD SYSTEM

Developed a back-office system to manage IT stock and implemented a KPI dashboard for IT team members using Chart.js for data visualization. The system enabled managers and team leaders to effectively monitor performance and resource utilization.
Technologies: AdminLTE 3, PHP, SQL Server, HTML, CSS, JavaScript, Chart.js , Angular

4. INTERNAL COMPANY INFORMATION SYSTEM

Developed an internal web application for employees to access company information, with role-based access control to restrict visibility and functionality for specific user groups
Technologies: PHP, HTML, CSS, SQL Server, jQuery, Ajax

5. EXECUTIVE REPORTING DASHBOARD

Developed a web-based reporting system for executives to view detailed information on demand. Data was extracted from SQL Server using Power BI and embedded into the website to support strategic decision-making.
Technologies: SQL Server, Power BI, HTML, CSS, JavaScript

6. GAME API DEVELOPMENT (LEGACY VERSE)

Contributed to the development of the game backend by designing and optimizing database schemas on SQL Server, combining ORM with raw SQL queries and stored procedures via Navicat for efficient data access. Built RESTful APIs to support core system functionality, implemented background services and scheduled jobs for recurring processes, and developed key game features such as the quest system to be consumed through APIs.
Technologies: JavaScript, TypeScript, Tailwind CSS, ANTD, Node.js, Express, RESTful API, SQL Server, Navicat, ORM (Sequelize/TypeORM), Git, Postman

7. INTERNAL DATA MANAGEMENT & POS SYSTEM

Contributed to the development of internal data management and point-of-sale systems, working on both backend and frontend functionality. Responsible for bug fixing and system enhancements to ensure reliable performance and support efficient organizational operations
Technologies: React , JavaScript, TypeScript, Tailwind CSS, ANTD, Node.js, Express, RESTful API, SQL Server, Navicat, ORM (Sequelize/TypeORM), Git, Postman

8. J&G BAG DELIVERY

A baggage delivery system designed to allow passengers to track their baggage status in real time. The system also provides a back-office platform for officers to manage verification, handling, and delivery processes, ensuring accuracy, transparency, and traceability at every stage.
Technologies: Next.js, NestJS, TypeScript, Prisma ORM, Tailwind CSS
